Digging for the Victims of Yesterday's Fire-Sickenning Odors From the Burning Flesh.

BROCKLIN, N. Y., May 6 -The work of digging for the bodies of the victims of yesterday's fire was commenced this morning. The extreme heat yesterday prevented any systematic search. The ruins were surrounded this morning by thousands of people, some merely curious, others had a sad interest in watching the work in the ruins. The fire men who worked down amongst the debri in the interior of the building said they could smell the sickening odor of burning human flesh, and occasionally, when the wind blew in that direction, the crowd standing on State street could distinctly detect the same horrible smell. The tenements on Atlantic avenue that had their rears burned out are still unccoupied. The occupants sheltered themselves last night as best they could, kind neighbors having taken the most of them in.

After two hours' work this morning the remains of another body was found and has been identified as that of Edward Butler. Up to noon to day nine persons had been station house. Those were: Gustave Lunze, sged twenty, single; William Logge, aged forty-three; Henry Darst; John McGrath, sged filteen; Adolph Motts, aged twenty-

They were all employed in the shops of William Durst. The other missing persons are: Henry Haffner, aged forty-five; Conrad Breling, aged twenty-four, and William Clark, em-

Crop Report of Kansas.

TOPEKA, Kas., May 6 -Secretary Sims, of the State Board of Agriculture, furnishes the

following crop news to the Associated Press: Winter Wheat-From information received at the Secretary's office it is found that the area sown to winter wheat in the fall of 1884 did not exceed 73 per cent, of that sown tha previouss fall; that of the acreage sown 27 per cent. has been killed by the frost and destroyed from other causes, and the land to a large extent seeded in other crops, leaving but 145,090 acres from which a product may be expected, an area equal to but 53 per cent. of the acreage of 1884. From a careful compilation of reports from 315 correspondents of the Board, representing every county in the State except one (Barber), the condition of the crop, April 30, is found to be 79 as compared with the condition one year ago. Rye-The acresge of rye has fallen off from that of the preceding year about 2 per

Special to the Sentinel. BLOOMINGTON, Ind., May 6 .- Every effort is being made to detect the robber. Colonel Friedley and several detectives are still at | ing. work about Horrodsburg. Men have been arrested at Michigan City and Frankfort, and a man named Rice, at Fort Wayne, answering the description.

It is believed, however, that the robber lives about Harrodsburg as there is no evidence of his leaving that place. A court of inquiry last night examined a witness at Smithville. Witness' brother left mysteriously, of which the witness tells an uncertain story. There is much excitement here. It said several arrests are likely to be made to night.

Thirty-Fourth District Election.

Springfield, Ill., May 6 .- Returns from the Thirty fourth District, where the election for a representative to the State Legislature took place to-day, are very meager up to a late hour, but so far the indications are favorable to the Democratic candidate, Leeper, although his majority will be small in comparison with the last election. The Republicans did not put a candidate in the field till nearly 3 p. m. Then they attempted to carry his election with a rush. They had secretly organized for that pur-

CRAWFORDSVILLE, Ind., May 6. - Yesterday evening during a severe rain storm Samuel Patterson and his two sons were at work in his barn near Shannondale, in the eastern part of the county, when it was struck by lightning. The oldest son, James, was instantly killed, while Mr. Patterson and the other son were badly shocked. The barn caught fire and was destroyed, together with

its entire contents. The store of Morris Herzog, general merchandise, at Waynetown, ten miles west of here, was entered by burglars last night and a large quantity of goods carried away. The entrance was effected through a rear window.

## RIEL'S REBELS.

The Battleford Fight a Bloody One.

BATTLEFORD, N. W. T., May 6 .- Farther details of the engagement between Colonel Otter's force and Pound aker's Indians show that after a forced march of thirty miles, reported as missing at the third sub-precinct | Colonel Otter reached the reservation and offered battle to the Indians, who readily answered. The battle lasted seven hours. The Indians used muskets, war clubs, bows and arrows and every conceivable weapon of warfare. Otter's men kept well under cover of the bush, and from an entrenched position poured a deadly volley of bullets into the red-kins, who fell by scores all round. Over 100 Indians are known to have been killed, and it is thought 200 are wounded. Oiter's loss was seven killed and fifteen bodies were found in the ruins at the rear of | wounded. No one has any doubt now that a bloody Indian war will follow. The Quapelle Indians are to-day reported to have risen and left their reserve. Crowfoot, Chief of the Blackfeet, is related to Poundmaker, and will, it is said. join him. The Dominion Government and Otter are blamed for not securing the ransom of Factor McLean and other white captives of the Indians before precipitating matters.

### THE TRUNK MYSTERY.

Detectives Still at Work-Hunting for the Murderer to New York City.

CHICAGO, May 6 .- Officers Morris and Arodo are working on the trunk mystery case, but up to last night had discovered nothing of any importance. The main efferts of these officers are directed toward | the Chinese ferry steamer Lin Yute, plying learning what expressman hauled the trunk to the depot on the morning of its departure from this city to Pittsburg. The brother of the murdered man was about the Central Station during the atternoon, but his ignorance of the English language made it impossible to obtain any information he may have pessessed. The trunk in which tha body was shipped arrived last evening, and was found at the Adams Express Company's office on Monroe street. It was not claimed at midnight, and this was attributed to the departure of Detective Bonfield for New York by the evening train, accompanied by Francesco Carnso. The explanation of this

The Bate at Which Uncle Sam is Paying His Debt.

[Times-Star Special.]

WASHINGTON, May 6 -The decrease of the public debt in the fiscal year that is to end eight weeks, will be over \$60,000,000 This will not be so great as in some former years, but it is faster than we generally suppose. Five millions of dollars a month dated the 3d inst., and comes from Battleford. The column fought Poundmaker for extinguishing the public debt, in spite of the people who are crying all the time that our debt is growing less in an imperceptible way. The debt is new only \$1,400,000,000 in round numbers Of course this deducts from iff the "cash in the Treasury," and it ought to do so. The cash in the Treasury is put there to redeem the greenbacksand gold and | it to the box office of the Dime Museum. silver certificates, and as these greenbacks and gold and silver certificates are counted as a part of the debt the cash which is always on hand to redeem them ought to be counted asan offset.

The debt statement gives the sum of \$1,883,000,000. Deduct from the cash in the Treasury, which amounts to \$483,000 000, and you have the debt cut down to \$1,400,000.000. The reduction of the debt this year has not been as great as in former years, but even at the present rate the total public debt will be wined out in about twenty-five years, or sbout the time which has elapsed since it was created. People who are in the habit of greaning about or debt being something too great to bear will do well to inquire about the debts of other nations. Take Italy for instance. Her dobt is over \$2 000,000,000, or about three times as much per head as our own. Russia, who is apparently eager for

war, has a debt of \$3,500,000,000. Great Britain, whose population is but 35,000,000 against our 55,000,000, has a debt of \$3,760,000,000, or about four times as much per bead as we have, and yet Great Britain is supposed to be exceptionally well off. France, brilliant and elastic France, whose recovery from her tarrible war a few years ago has been the wonder of the world, Oats-The acresge of oats has increased new move is based upon information derived | Hon. carrying. Our debt is about \$25 per haad all round; that of Italy nearly \$75 per head; stand under for any great length of time.

Our debt of only a little over a billion hears interest, or to be exact, \$1 196.150.350. Of this only as much as \$250 000,000 bears as much as 436 per cent interest. It is interesting to see how much money remains in CLEVELAND, May 6 .- A suit of interest to the Treasury unclaimed, after the interest has ceased to accrue. On some of this the interest ceased a balf a century ago, while on large sums interest has not accumulated for twenty years, and yet the interest has never been asked for.

"What do you suppose is the explanation of the delay in presenting these bonds for payment, that have been due so long? your correspondent asked of an official, running over the curious list, which, by the way, foots up several millions of dollars.

"That's a mystery," he snawared, with a smile. "I suppose some of it has been lost or stolen, some of it burned up, some of it stuck away in forgotten places perhaps some is held by people who do not know that interest has ceased on it or who do not know that they have the bonds at ail. Theresometimes come to us some of these that have come to the light by some curious turn in the wheel of fortune. Of course a very considerable portion of them will never turn up or be presented for payment.""
